

## Position Description – D365/CRM Developer

POSITION	D365/CRM Developer
REPORTS TO	Manager – Solution Delivery

### JOB OVERVIEW

Conduit Associates' core focus is on helping organisations in the planning and execution of complex solution development projects. We work with a broad range of corporate and government organisations, across a wide range of technologies including the Dynamics, Office 365 and Azure platforms. We are sought after due to our track record of managing the successful delivery of highly innovative solutions under challenging conditions, and often work on behalf of clients to manage multi-vendor software projects.

Development expertise is central to our approach, and as a D365/CRM Developer you will be expected to be an expert in designing and developing solutions in Microsoft Dynamics 365, using both configuration and leading-edge client-side development technologies such as JavaScript and React. You will be responsible for the rapid implementation of solution designs often as part of a large multivendor D365 project. When not working on client projects, you will be developing tools and applications to help streamline our solution delivery as well as researching and training in the latest D365 development techniques and frameworks, and Microsoft Business Central.

Whilst development expertise is highly valued, we also value team members who demonstrate strong communication skills and a willingness to take ownership for delivering great outcomes and experiences for our customers. Our success to date has been driven by word-of-mouth referrals and our reputation as a trusted advisor that can fix the problems and get solutions delivered, and we expect that you will always strive to delight our customers.

### PURPOSE OF THE ROLE

The main purpose of the role is as follows:

- To maintain our capability and reputation as experts in D365 solution design and delivery.
- To assist with or undertake development work as part of a solution delivery.
- To advise and guide client and other vendor teams as part of a solution delivery.
- To contribute to the development of Conduit tools and applications.

### QUALIFICATIONS

You will need the following to be successful in this role:

- Minimum of 5 years development of quality customisation and development experience in Microsoft CRM/Dynamics 365
- Strong communication skills in English
- Demonstrable technology leadership skills

## ESSENTIAL SKILLS

- Microsoft CRM/D365 Configuration
- Microsoft CRM/D365 Development
- React front end development with supporting frameworks:
  - Redux
  - Typescript
  - Webpack
  - Jest / React Testing Library
  - Material UI or similar UI component frameworks
- Excellent verbal communication
- Excellent written communication
- Excellent problem-solving skills

## DESIREABLE SKILLS

- Server-side (.Net, .Net Core) development
- Microsoft SharePoint customisation and development
- Integration solution design and development
- Azure Logic Apps / Azure Functions development
- Continuous integration / delivery systems experience
